Scathing report says Russia at war with Ukraine
Putin is preparing for “hybrid war”

A Washington-based think tank on international affairs has released a scathing report on Russia’s “direct military intervention” in eastern Ukraine, concluding that Russian President Vladimir Putin has led his country into war and lied about it. http://goo.gl/8oVbk0

The decision by President Putin to classify all information about military personnel who die in peacetime remains one of the most important topics of the past week. Why did Putin sign this decree? Is he preparing for war or is he simply irritated by the constant search for the graves of soldiers who have died in Ukraine, by articles in opposition media, and by the claims of human rights activists? The answer can be found in the text of the decree. Putin is not preparing for war. He is preparing for “hybrid war.” http://goo.gl/lmWVTd
